About Rain Deck

Rain Deck is the Industry Leader in Commercial, Light Commercial and Residential Splash Pad Products

Rain Deck splash pad products represent the best in quality, innovation, and affordability. Rain Deck stands on the commitment to provide a wide platform of exceptional products and splash pad expertise that will allow our partners to deliver safe and enjoyable splash pad environments.

With a comprehensive selection of premium splash pad products, Rain Deck can fulfill any splash pad need from the large community splash pad to the individual residential application. Our relentless commitment to creating and manufacturing products that exceed industry expectations has placed Rain Deck as a leading manufacturer in the aquatic recreational industry. Along with a versatile collection of products, Rain Deck remains committed to provide our customers with reliable solutions to any splash pad application, including architectural design and access to an ever-expanding database of qualified Rain Deck installers.

Rain Deck's passion and enthusiasm for all things splash pad is your key to quality and affordability. With a qualified team of innovators we are able to partner with our customers from the moment of design inspiration to final realization of splash pad entertainment. From a wide range of commercial grade stainless steel splash pad features to category-defining light commercial splash pad products, and our patented residential splash pad kits, we lead the industry in bringing splash pads to a wider selection of applications such as campgrounds, child care centers and RV parks.

Our success is dependent on creating value for our customers. We aim to deliver on our promises of providing you unique, reliable, and affordable products that bring continuous joy year round for those who make a splash on a splash pad with Rain Deck water features. We invite you to explore our Commercial Splash Pad, Light-Commercial Splash Pad, and Residential Splash Pad product lines.

**LET THE
FUN
BEGIN!**

Our Commitment

Durability Through our comprehensive stainless steel product line, Rain Deck delivers the reliability that is critical to each commercial splash pad. All components of a high traffic commercial splash pad need to be robust and able to perform day in and day out under all aspects of stress and use. Rain Deck's stainless steel products are built to withstand and perform flawlessly in any environment. Our distinctive advantage is providing our clients with the ability to interchange above ground water features using our specially designed Rain Deck Universal Footing Bases.

Affordability Rain Deck provides commercial splash pad products that have been refined through rigorous testing and comprehensive customer feedback. We manufacture all of our products in-house using state of the art fabrication. This allows us to identify the most popular and effective commercial products that fit in a wide variety of splash pad designs. With continual refinement and innovation of our popular products, Rain Deck is able to pass the savings on to you, our customers.

Warranty Our warranty starts with our unmatched customer support. We offer guidance and assistance at any stage of your splash pad project, from installation to winterization and spring start-up. These support services are gladly offered to our clients at no additional charge.

Versatile Splash Pad System

At Rain Deck, we strive to keep things simple and user friendly while allowing for versatility. We recognize the need for flexibility and adaptability depending on the scope and budget of each splash pad project. Rain Deck has designed nearly all of our above ground features to attach to an universal in-ground footing base, which allows our customers to easily add, swap or remove features at any time. In some cases, splash pads are built with universal footing bases that essentially hold a place for the future installation of an above ground feature. Other splash pads are specifically designed so above ground features can be swapped in and out - or with each other - to give the splash pad a fresh look from time to time.

Rain Deck offers a variety of ground spray nozzles, each with a unique spray pattern and designed to fit into a Rain Deck Universal Housing. In addition to the versatility of our above ground features, our ground spray nozzles are also removable and interchangeable. These universal housings are incorporated throughout our extensive product line allowing nozzles to be easily removed or swapped out. Rain Deck's innovative systems allow for endless water play possibilities and is key in setting us apart from all other splash pad manufacturers.

Rain X-Change™ Program

Keep your splash pad looking fresh and up to date through the Rain X-Change Program™. Rain Deck is the only company in the industry that provides our customers to trade in a used above ground feature for credit towards a brand new feature. Now you can have the most popular and updated features on your splash pad at an affordable price. Contact one of our professional sales representatives to ask about our Rain X-Change Program™ and learn how to give your splash pad a brand new look!

Splash Pad Markets

Rain Deck prides itself on being the only splash pad product manufacturer that caters to all three splash pad markets: Commercial, Light-Commercial, and Residential. This enables us to offer the best splash pads available for every need and budget. Whether you are looking for a small and simple splash pad in your own backyard, a mid-size splash pad for your campground or community park, a large splash pad for a hotel/resort or city park, or anything in between, Rain Deck will be able to assist you every step of the way.

COMMERCIAL SPLASH PADS

Commercial splash pads are popping up everywhere today! They are extremely popular for the safety and interactivity they bring to places such as amusement parks, zoos, large resorts, city parks, and more. Their durable stainless steel, powder-coated features can withstand high traffic locations, and their value will add to your commercial property, making it even more attractive to your guests.

**PUBLIC PARKS – AMUSEMENT PARKS – LARGE HOA/COMMUNITY PARKS – PUBLIC ZOOS – HOTELS/RESORTS
– APARTMENT COMPLEXES–OUTDOOR MALLS–PLACES OF WORSHIP**

LIGHT COMMERCIAL SPLASH PADS

Rain Deck has advanced the application of splash pads in new and expanding environments never thought possible. Light-Commercial splash pads are extremely unique in that they offer the same benefits as our Commercial splash pads, but at a more affordable price point. Rain Deck Light-Commercial Splash Pad Products bring incredible value to such places like day care centers, preschools, campgrounds, or any location that has on-site staff and operating hours.

CHILD CARE FACILITIES – SMALL HOA / COMMUNITY PARKS – RV PARKS & CAMPGROUNDS – DOGGIE DAYCARE

RESIDENTIAL SPLASH PADS

Residential splash pads are a great fit for any backyard! No matter the size of your backyard, our Residential splash pad products are safe, fun, and affordable. Rain Deck's Patented Splash Pad Kits can be installed by any contractor, handy-man, landscaper or do-it-yourselfer. Rain Deck is the pioneer of the residential splash pad. Having a personal splash pad in your own backyard was not a reality until Rain Deck burst on to the scene with our residential product line over a decade ago. Our goal was to innovate residential splash pad products that would be as reliable as our commercial and light-commercial splash pad products but with a price point that would rival the installation of a traditional swimming pool.

LUXURY HOMES – SEMI-CUSTOM HOMES – TRACT HOMES – CONDOMINIUMS

Splash Pad Design

YOU DREAM IT. WE DESIGN IT.

Rain Deck has designed thousands of custom splash pads to fit a wide variety of themes and uses. Our design team can take your penciled sketch to a fully customized set of working plans. We will work directly with you and your designated architect or designer, thus making the splash pad process seamless. From CAD drawing to full-color 3D rendering, we can do it all. We work hand in hand with our customers to bring their visions to reality. Whether it's a unique color scheme or a one of a kind feature, our design and engineering department is available to meet any need for our splash pad clients. With the unique ability to customize even the smallest feature, Rain Deck is your source for tailored splash pad products.

Splash Pad Systems

Rain Deck offers a variety of splash pad systems. Whether it's recirculation systems, fresh water systems, pool tie-in systems, or grey water systems, Rain Deck can make it happen. Our recirculation splash pads allow for water conservation while using state of the art water treatment systems, including automatic chemical feeders, and UV sanitation. We can also build custom features for your recirculation system, such as sediment filtration tanks or complete skid mounted systems. Fresh water systems can be designed specifically to your needs, enabling the owner to determine the exact GPMs (gallons per minute) used. From simple "easy to install" kits, to custom built splash pad packages, Rain Deck has the experience to design your splash pad from the ground up.

COMMERCIAL ABOVE GROUND FEATURES

Rain Deck's industry-leading commercial features are built with one of the best warranties in the industry. Rain Deck uses 304L stainless steel to ensure long-term protection from exposure to harsh chemicals, UV radiation and vandalism. Our in-house fabrication team employs innovative designs to give our entire commercial product line a clean, sharp look. Rain Deck commercial above ground features are designed to attach to a Rain Deck universal footing base, giving you the option to remove or interchange features at no additional cost. All Rain Deck commercial features are finished with a polyester resin powder coat and are available in many attractive colors.

STAINLESS STEEL FOOTING BASE INSTALLATION

The Rain Deck Stainless Steel Footing Base is the foundation of nearly all our commercial above ground features. This universal footing base allows every customer the versatility to interchange their features at any time. This makes Rain Deck splash pads expandable and affordable.

Permanent Feature Footing Detail

COMMERCIAL

Rain Deck provides instructions and hardware for installation of all features that do not use the RDS399 Footing Base, such as arches, loops and towers. Contact your Rain Deck representative at 1-888-445-RAIN for more information and assistance.

LIGHT COMMERCIAL ABOVE GROUND FEATURES

Rain Deck Light Commercial features are an affordable and attractive addition to any light commercial splash pad. Made with high-strength PVC and finished with an industrial-strength paint, light commercial features are a fantastic way to give your splash pad a colorful and interactive look. With Rain Deck's industry-leading interchangeable products, you can control the design of your splash pad by adding or changing any feature with the popular Rain Deck universal footing base.

The Rain Deck Footing Base is the foundation for all of our light commercial above ground features. This universal footing base allows every customer the versatility to interchange their features at any time. This makes Rain Deck splash pads expandable and affordable.

GROUND SPRAY ELEMENTS

The Rain Deck Universal Housing is just that... universal. With the Rain Deck Nozzle Tool, customers can swap out one nozzle for another at any time. Rain Deck currently offers many different types of spray nozzles, including winterization caps and custom nozzle patterns.

So, whether you want to mix things up a bit for the kids, or need to winterize your splash pad at the end of the season, Rain Deck has specially designed their ground sprays to make it hassle free. Rain Deck offers ground spray jets in Delrin, PVC, aluminum, stainless steel, and brass. Ask a Rain Deck representative about the benefits of each type of material.

LED Lighting and Nozzles

Rain Deck splash pads have always been a popular way to keep the kids cool and entertained during the day... but what about nighttime use? Rain Deck LED lights and our new patent pending lighted nozzles bring rich, vibrant colors to the water play area and create beautiful light shows for children and adults alike. Our energy conscious splash pad customers will love this new product, as Rain Deck LED lights have long lifetimes and high energy efficiency. According to the U.S. Department of Energy, no other lighting technology offers as much potential to save energy and enhance the quality of our building environments as LED lighting. Brighten up your splash pad with some LED lights!

Custom Features

Our professional design team can create any project from a simple concept to a custom themed water attraction with concert audio-visual and lighting enhancements. With our state of the art machining and fabrication equipment, there is no limit to what we can create. From large dumping bucket towers, to themed splash pad features, we can customize any project to your unique specifications. Send us a sketch, we will get you a quote. It's really that simple.

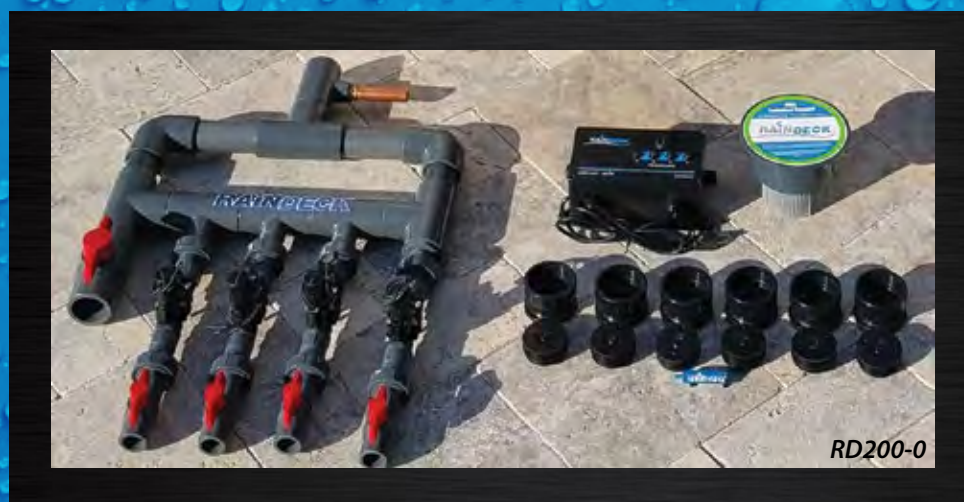

Rain Deck Splash Pad Kits

As the innovator of the residential splash pad, Rain Deck has created and patented a residential splash pad kit that provides the essential components that can give anyone an incredible splash pad installation. With sales and installations dotting the country, Rain Deck is the expert in providing a comprehensive group of components specifically manufactured for splash pads. We have trained hundreds of professional installers, professional landscapers, and do-it-yourselfers on the ease of installing a Rain Deck Splash Pad Kit.® Buy your splash pad products with confidence from the industry's leading innovator and creator of the only patented splash pad kit.

Rain Deck founded the residential splash pad market on the premise of providing the consumer an affordable, safe and reliable water play feature for their residence. We quickly found out that this revolutionary splash pad product was not just for the residential customer - we have had a tremendous demand for Rain Deck Splash Pad Kits® from RV Parks, Campgrounds, Day Cares and other light-commercial applications. Our splash pad kits were even featured on episodes of DIY's "Yard Crashers" and "The Vanilla Ice Project."

Rain Deck Splash Pad Kits® offer a great base to start the design of any splash pad. Along with the purchase of a Rain Deck Splash Pad Kit,® customers often include one or more of the Rain Deck above-ground water features.

Control Systems & Activators

At Rain Deck, we've designed control systems that are extremely affordable while giving the customer the ability to fine-tune each aspect of the splash pad with ease. We realize that every splash pad is unique when it comes to operation hours, recirculation pump settings, spray jets/ features programming, water chemistry, etc. We also understand the importance of keeping things as simple as possible for the end user. That's why all Rain Deck control systems are designed to be easy to use and built to last.

Pumps, Filters, Parts & More

Whether you need something simple for a backyard splash pad, something for a more sophisticated commercial splash pad, or anything in between, Rain Deck is your supplier for pumps, filters, chemical controllers and UV sanitizers of all types. Don't see something in our catalog? Don't worry! We have access to anything and everything pertaining to splash pads. Get us the part number, and let us quote it for you.

Splash pads are not just built with spray jets and dumping buckets. There are many "behind the scenes" parts that make up a splash pad. Some parts include check valves, 3-way valves, bulkhead fittings, auto water levelers, and more. Not sure how a certain part comes into play? Ask us! We will gladly give you the answers and information you need.

Holding Tanks

Our standard splash pad tanks come in a variety of sizes to meet the demands of any size splash pad project. All of our tanks can be fitted with multiple fittings to be scalable for any number of water play features and dedicated recirculation lines. Each tank comes standard with one (1) suction line fitting, one (1) return line fitting, one (1) drain line port and one (1) auto fill hook-up fitting.

Our patented single wall and double wall Splash Pad Sediment Filtration Tank sets the industry standard for efficient water sanitation. This tank meets the criteria for the most stringent health code requirements. Our patented tanks can be used as a standalone splash pad recirculation tank or in combination with our other holding tanks for increased water demands.

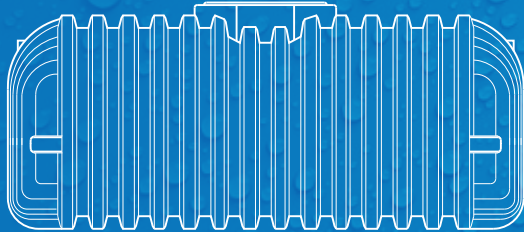

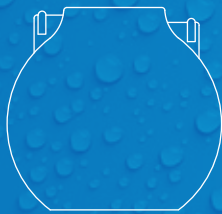

*Please speak with a Rain Deck representative to determine the right tank size for your project.

RUBBER SURFACING

Rain Deck offers high quality granulated rubber in sixteen vibrant colors for comfortable, safe, and attractive splash pad surfacing. It can be combined in many different colorful and unique ways to create just the look you want.

Our rubber surfacing has been featured on multiple DIY network shows, including “the Vanilla Ice Project”. Whether it’s a fun beach lagoon with a pirate ship or a simple collage of colorful patterns, Rain Deck has the rubber surfacing to make it happen!

Purchase With Confidence

Rain Deck has taken part in thousands of splash pad projects. From initial consultation, to design, to installation, and beyond, we have been a part of every step and process involved in splash pads. We have dug the ditches, plumbed the pipe, poured the concrete, installed the equipment... we've done it all. The best part is, we are willing to share this info with all of our customers any day of the week. Let us help you build your next splash pad.

Rain Deck offers an on-site training package for those that feel they could use a little extra help. Rain Deck's "Purchase With Confidence" program is the only one of its kind in the industry, designed specifically to meet the needs of our partners and their staff to save them thousands of dollars. Please contact us at 1-888-445-RAIN or raindeck.com for more information.
